

Chesterfield Central Park Lake

City of Chesterfield, MO

Central Park is a 38-acre park located in Chesterfield, Missouri that includes numerous recreational opportunities, such as playgrounds, pavilions, and picnic areas, as well the new Chesterfield Family Aquatic Park. Future developments include a hiking/biking trail system around the 8-acre Central Park Lake.

Intuition & Logic was hired by the City to develop a conceptual design for lake enhancements, aimed at improving the habitat value, aesthetics and recreational amenities surrounding the lake. The preliminary design plans included specifications for lake enhancements, incorporating shallow wetland “shelves” along the shoreline, coir log shoreline protection, fish spawning beds, fishing access and dam viewing areas.
