

## The Animal House

HOK, St. Louis, Missouri

The project is in the conceptual phase, and Intuition & Logic is the project Civil Engineer involved in the design Charrettes and in developing the conceptual layouts. Once the layouts are complete the primary fundraising activities will begin. The goal of this project is to replace the City of St. Louis' existing animal shelter, dated to the 1940's, with a state of the art, LEED certified, Animal Care Facility that will be relocated to Ellendale Park. The Animal House Fund, Inc., a private, nonprofit organization, which is seeking to raise \$4 million in cash and donations for the design and construction of this facility, is the driving force behind the project. Once the new facility is completed, ownership of the building will be turned over to the City of St. Louis. The focus of the Animal House will be public education on the environment, animals and the community while providing humane treatment of the City's transient animal population.
